ACTION TAKEN REPORT

COURSE EVALUATION BY STUDENTS 2013-2014

The course evaluation by students was studied and further actions were recommended. It was observed that more than eighty percent of the students were confident that the curriculum will equip them with the necessary skills for their future. About 75% students felt that the content of the course is adequate to meet the course objectives. They also felt that the resource materials were including text books, reference materials and lecture notes were useful. A vast majority also felt that there is enough theoretical background provided for each topic included in the course. Regarding faculty interaction, about 15% felt that the current faculty interaction is insufficient, while 2% felt that it was poor. This matter has already been conveyed to the College Academic Council. The council has directed all the HODs to instruct the faculty members to improve student-faculty interactions through more frequent PTA meetings, especially in the case of weak students.
